Partner with the Industrial Component Experts

Founded in 1992, Fast-Rite has grown to be one of the more successful and diverse industrial components suppliers in North America, supplying millions of parts to the world's more sophisticated and demanding manufacturers.

The continued success of Fast-Rite is no accident, built upon an unwavering commitment to providing tangible bottom-line cost reductions with exceptional quality, personal service and dedication to customers' needs.

We believe it is this deep understanding of the complexities of international manufacturing and our passion for innovation that sets Fast-Rite apart from the competition.

Fast-Rite sells more than just high-quality fasteners, stampings, castings and assemblies. Our lines include electronic components, MRO

and PPE items, abrasives, anchors, tools and tool accessories, just to name a few.

Fast-Rite's distribution centers stock billions of standard line items as well as customer specific products. Our advanced SAP/HANA system, a reliable high-speed kitting line, the latest real-time, radio frequency-controlled warehouse management technology and a fully-computerized quality assurance laboratory ensures parts arrive on-time, every time and to the highest quality standards.

Fast-Rite has full-service sales, warehouse and distribution centers in the US, Mexico, China and Taiwan.

Fast-Rite de México, our IMMEX-compliant facilities in Mexicali and Monterrey, Mexico, also offer third party logistics services with a full Range of 3PL services, including warehousing and distribution operations, contract warehousing, public warehousing and a wide range of value added services.

CUSTOMERS’ NEEDS.”

Eight Reasons Why Fast-Rite is the domestic and import industrial component supplier of choice

1 We have prices that are hard to beat

Through our focus on Lean Component Management, close supplier relationships, direct manufacturing and volume, we can pass on discounted pricing directly to you.

2 We are synonymous with quality

Often, it's what you don't see that makes all the difference. Our fully-equipped quality assurance labs in the US, China and Taiwan conduct exhaustive performance tests to make sure every product we supply meets all domestic and international standards for quality. Our standard tests include tensile/proof-loading, thread gauging, torsional, plating thickness, ductility and much more. We are an ISO 9001-2015 certified company.

4 We understand service is more than just a word

Fast-Rite was founded on the principle of service and it resonates with everything we do. We are a customer-driven company, always searching for better ways to manage each request.

3 We're Fast and Rite

We use the latest in Data Collection Systems to ensure quality, accuracy and efficiency. Rest assured, the Rite parts will always get delivered at the Rite time.

8 We have global reach

With full-service sales, distribution, and manufacturing operations in the US, Mexico, China and Taiwan, Fast-Rite is ready, willing and able to meet the needs of our customers worldwide.

5 We know success is a team game

We work closely with our customer's Engineering Departments, Product Managers and Procurement teams, focusing on clear, complete communication to impact your bottom line.

6 We're always evolving

Because the ways of doing business continually evolve, we always have an eye to the future, finding better tools, learning the latest methods to streamline production and enhance and then pass these savings on to you.

7 We're street smart

We employ knowledgeable component and productivity experts. We readily share their expertise with clients to help streamline operations, improve productivity and most importantly, improve the bottom line.

Introducing Fast-Rite THE OEM OPTIMIZER™

PRODUCT
PRICE
PROCESS

The complete supply chain component cost optimization program for OEMs in a global economy.

Paying the lowest prices for components is critical. But choosing a component supplier on price alone can have unintended consequences.

Hours a day of your staff's time can get wasted chasing inventory transactions, placing orders, expediting, inspecting, processing invoices and dealing with excessive inventory on your shelves.

What you really need is a total supply chain assessment and cost-reduction strategy that looks much deeper than the just the unit price.

The OEM OPTIMIZER™

Fast-Rite's OEM Optimizer is a complete supply chain

assessment and cost-reduction strategy that optimizes the ENTIRE component cost chain, from the MRP analysis, order, receipt of goods to the final black-flush out and payment.

This is how we deliver clients the lowest TCO in the business.

Our OEM Optimization doesn't stop at the part cost. We provide our Fast-Rite Genius suite of component management programs that minimize your transaction costs: procurement, inventory, material handling and much more.

Our world-class data sharing and integration software works seamlessly with any system's security requirements and can load and manipulate data far faster than typical data entry, with a complete audit trail.

We can even provide digital smart bin solutions that monitor your stock levels, automatically detects low levels and instantly sends a reorder. eliminating the need for counting trips and "milk runs". That means no more safety stock, no more emergency orders, and more importantly, no more lines down. Our bins order for themselves. It's the automated, lean bin solution you've been waiting for. That's OEM Optimization!

What's this all add up to? We provide you with a leaner environment, better space utilization, better inventory solutions, and better plant operational value. That's OEM Optimization!

OUR MISSION STATEMENT

To provide OEMs with world-class service in the management of quality industrial components while optimizing the supply chain through the integration of people, technology and experience!

OUR VISION STATEMENT

To Optimize OEM's management of industrial components.

“WE CAN ACCEPT MANY
DATA FORMATS AND
TRANSMISSION METHODS..
THROUGH ANY
ENDPOINT
CONNECTION.”

Data Optimization

Fast-Rite International, powered by SAP/HANA can deliver on the promise of supply chain transformation by making it transparent and sustainable.

Digital Supply Chains are more efficient allowing companies to be more agile and profitable. EDI – electronic data interchange makes communication between two partners seamless. Fast-Rite can provide classic to modern EDI.

Modern EDI, including Web Services, API's and other tools, reflect the

increased diversity of partner, application, and service interfaces present in business environments today. We can accept many data formats and transmission methods including XML, spreadsheets, bar codes, RFID transmitters, IoT sensors and flat files through any endpoint connections between partners, applications, data, and cloud services, all which provide process flexibility and visibility.

Rest assured the Rite parts will always get delivered at the Rite time, at the Rite price. That's OEM Optimization!

Every fastener and component. Any industry or application.

We supply the highest-quality fasteners, stampings, castings, and assemblies to leading manufacturers around the world. From Taipei to Toronto, Mexico City to Manhattan, our satisfied customers span the globe.

Anchors	Bolts	Clamps and clips	Electronic hardware	Rivets
Inserts	Metrics	Nuts	Pins, keys and rings	Specialty products

Stampings, Castings, Assemblies and any other Industrial Component

Customize your products with your choice of materials and finishes

As our name implies, we are fastener experts. Fast-Rite supplies all types of fasteners, for any industry and application. No matter what type of fastener your business needs, we deliver the right part, at the right price, on time – every time. That’s Fast-Rite’s commitment to you.

Along with our full line of standard fasteners, we manufacture custom fasteners in virtually any material, including ferrous metals, non-ferrous metals such as brass, Monel and Inconel, and plastic. We can accommodate virtually any secondary process, including platings, coatings, nylon patches, drilling, flattening. All of our products will meet and/or exceed environmental compliance standards.

Manufactured to the highest-possible standards

Fast-Rite fasteners are manufactured to comply with our customer’s stringent standards. We also meet or exceed industry-leading specifications including IFI (Industrial Fasteners Institute), SAE (Society of Automotive Engineers), ASTM (American Society for Testing and Materials Standards), ANSI (American National Standards Institute), JIS (Japanese Industrial Standards) and DIN.

Additionally, we’re experts at fastener applications that will increase your productivity. We will recommend the proper fasteners for your project, helping you reduce employee fatigue, repetitive stress injuries and employee downtime.

Premium- quality precision metal stampings

Fast-Rite offers a full line of the highest quality metal stampings including Four Slide and Multislide, Precision Laser Cutting, Progressive Die Products and more. With our commitment to innovative design and plating customizations, it's easy to get components that meet your stringent applications.

We can manufacture precision stampings from virtually any material, including steel, bronze, copper, brass, aluminum, steel and stainless steel – four slide and multi-slide, precision laser cutting, progressive die products and more. We also offer secondary operations such as deburring, tapping, heat treating and plating.

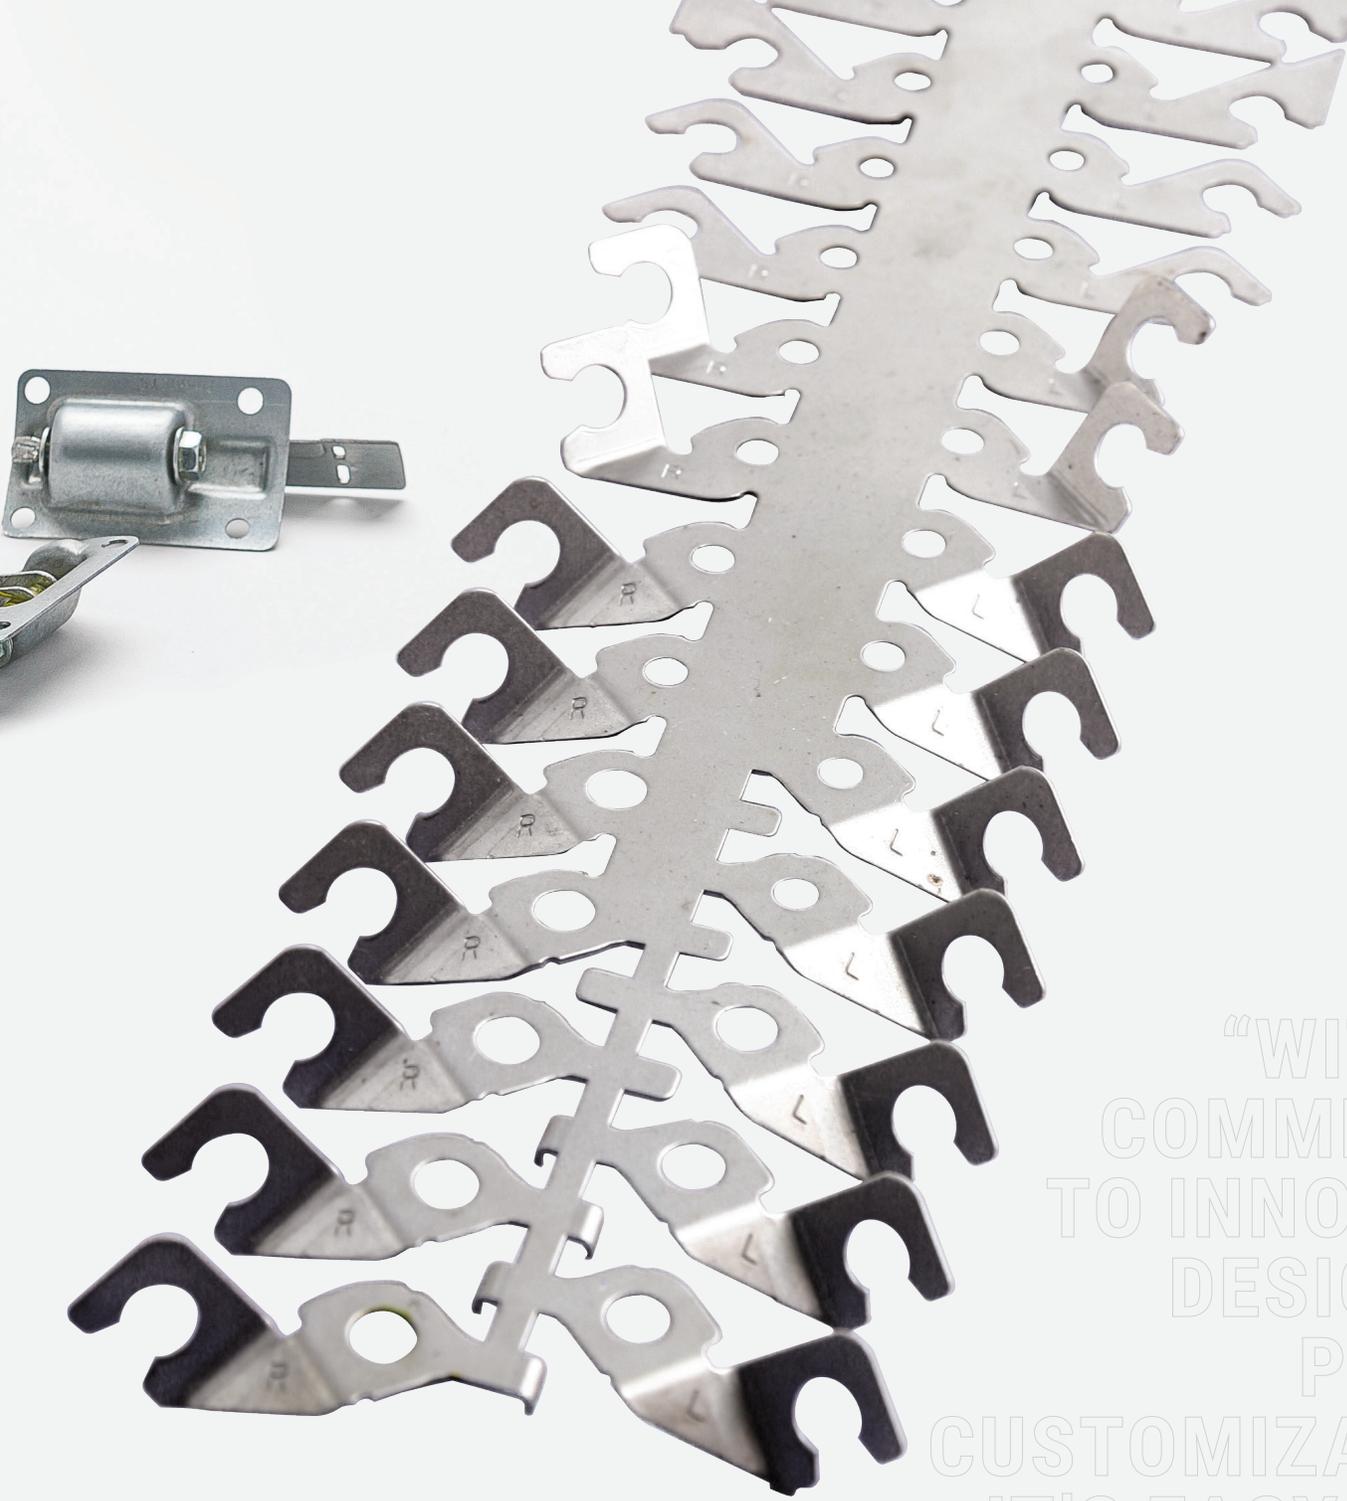

And you can customize with a wide variety of finishes, including zinc in all colors, nickel in all colors, phosphate, mechanical zinc, galvanized zinc, chrome, gold, brass, copper and more!

Fast-Rite's signature stamping capabilities

- ↳ Precision custom stamped metal parts
- ↳ Machined, wire forms and turning parts
- ↳ Heat-resistant metal alloys, ferrous, nonferrous and exotic metals
- ↳ Progressive metal stamping
- ↳ Prototype/Short run capabilities
- ↳ Value-Added Assembly Services

Fast-Rite's capabilities include

- ↳ Over 60 25-800 ton high-speed power presses
- ↳ Cross shaft presses
- ↳ Straight slide presses
- ↳ Four slide and multislide machines
- ↳ Deep draw
- ↳ Custom eyelet

COMPONENTS
THAT MEET YOUR
STRINGENT
APPLICATIONS.”

Material thickness capabilities

- ↔ Width: .047 (1.2 mm) to 39-3/8 inch (1000mm)
- ↗ Length: .157 (4mm) to 39-3/8 inch (1000mm)
- ↕ Thickness: .004 (.1mm) to .394 inch (10mm)

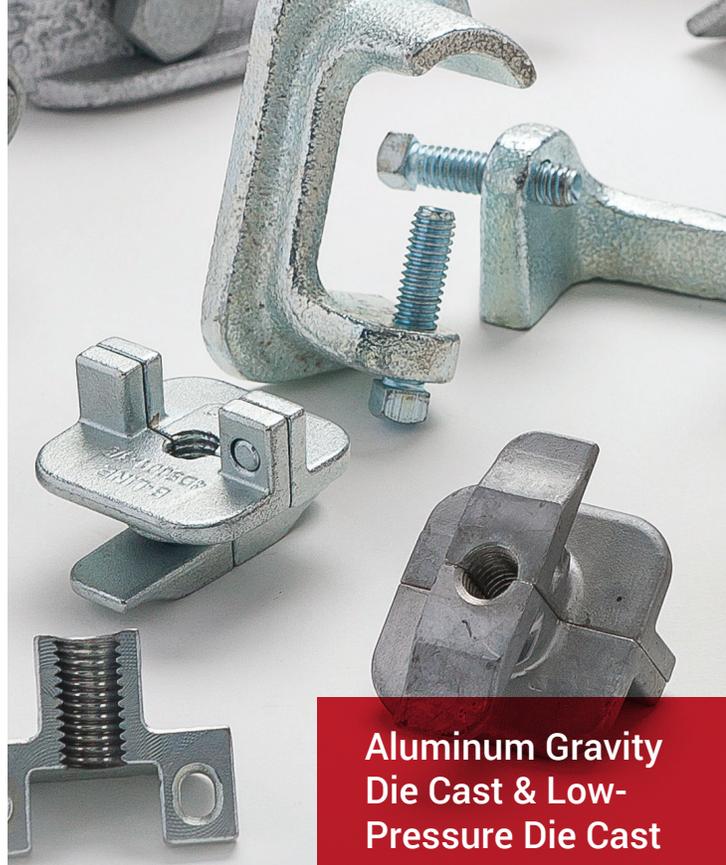

High-precision, high-quality metal castings

Whether you need pipe fittings, motorcycle castings, alternator housings, water pump impellers or heat sinks, Fast-Rite can create high-precision castings that meet your specifications.

Our casting process control software controls everything from raw materials and melting temperatures to chemical composition and molten iron weight. This allows our technicians to analyze production, perform quality assurance and ensure reliable, consistent output.

Our quality control team enforces ISO 9001 protocols during every phase of the manufacturing. Micrometers, CMM, Vision System and other high-precision quality-control equipment are regularly monitored to ensure all parts meet the tightest tolerances.

And because we use exacting process methods – from material inventory and casting process to packing and transportation– we can control the cost and deliver both prototypes and mass-volume production runs at the best price.

Aluminum Gravity Die Cast & Low- Pressure Die Cast

Molten metal is injected into a sand or permanent mold by force of gravity.

ASSEMBLIES

Custom assembly services that save you time and money

Save time and money by letting Fast-Rite manage your assembly: our solutions are Fast, Rite, and affordable.

Whether you're looking for a complex assembly or a simple one, we have the capability to assemble cold-headed, hot-forged, screw-machined or wire-formed parts and stampings to the most-exacting specifications.

Fast-Rite can manage any project from start to finish, providing either high- and low-volume assembly, depending on your needs.

It's all part of our commitment to full-service, one-stop sourcing.

Fast-Rite offers

- ⌵ Rapid nuts and bolts assembly
- ⌵ Convenient single vendor sourcing and assembly
- ⌵ Flexibility and FAST turnaround
- ⌵ Transportation, including pickup and delivery
- ⌵ Unlimited capacity

Fast-Rite can provide standard or custom requirements for almost any kind of **electronic and circuit board hardware**

Electronic hardware

- ↳ PCB spacer/supports
- ↳ LED holders and light pipes
- ↳ Handles/grommets/bushings
- ↳ Cable clips/routing clamps
- ↳ PCB terminals/contacts/battery holders

EMI and thermal products

- ↳ Thermal gap pads
- ↳ EMI gaskets, EMI absorbers

Cable protection/sleeving

Cable glands/ IP68 rated cord grips

Spacer supports	Wire holders	Parts housings	Rubber feet
Round spacers	Wire locks	Tact switch caps	Plastic feet
Threaded spacers	Stick wire marks	USB housings	EVA foam
LED spacer supports	Hole plugs	Plastic screws and nuts	Terminal blocks
LED holders	Snap bushings	Connector covers	Testpins
LED masks	Cable ties	Snap rivets	PCB terminals
Light pipes	Grommets and handles	Screws	Cable glands
90 degree LED spacer supports	Spare parts washers	Card guides	Any custom designs
Cable mounts	Transistor covers	Inserts	

Fast-Rite introduces another fastening solution – RIVLOC™

The RIVLOC™ technology of fastening and assembly is widely used in many applications

- ↳ Cars, motorcycles, bumpers, safety belts, airbags
- ↳ Commercial vehicles, public transport, special vehicles, rail vehicles
- ↳ Electrical and electronic products, high and low voltage switchgear
- ↳ Food processing industry, ovens, juicer, snack bar
- ↳ HVAC equipment, Air conditioning fan, boiler
- ↳ Office furniture, cash register, desk, chairs, photocopiers
- ↳ Construction and civil engineering, street decoration, greenhouse
- ↳ Leisure facilities, rock climbing walls, cruise ships, swimming pools

RIVLOC™ Advantages

- ↳ RIVLOC™s blind rivet nuts and studs are the most versatile solution for adding a strong reusable internal or external thread to thin-walled work pieces, and keep an aesthetic appearance
- ↳ Compatible with all substrates (Steel, magnesium, aluminum, plastics, composites)
- ↳ Corrosion protected – no additional finishing is required after setting, even with coated or painted components

Safe and eco-friendly solution

- ↳ No fumes (no exhaust needed)
- ↳ No heat
- ↳ No heat impact on application surface treatment
- ↳ No deformation (no material resistance)
- ↳ No pollution
- ↳ No risk to the operator

RIVLOC™ comes in a full line of inch and metric sizes in Steel, Stainless Steel, 316L Stainless Steel and Aluminum.

We can manage your kits and packaging from start to finish

Fast-Rite has the capacity to supply, stock, package, barcode and label components for all your projects.

We're able to pack your various components into bags, boxes, cartons, clam shells and blister packs, saving you time, money and labor.

With our multiple kitting line stations and bagging equipment, we're able to run numerous jobs at once and have the flexibility to accommodate rush orders.

SMALL AND LARGE RUNS

to fit your project requirements

Fast-Rite offers:

ABILITY TO KIT

multiple items in various quantities

GUARANTEED 99.8% ACCURACY.

Our Optic-Weight check-system rejects shortages and overfills.

SHORT LEAD TIMES

PLUS, WE CAN COMPLETE YOUR PROJECT WITH CUSTOMIZED PRINTING.

We offer both color and black-and-white printing and can print directly on the bags or on labels, customized to your requirements.

TURNKEY COMPONENT
MANAGEMENT SERVICE.”

MANAGEMENT

9 Big Benefits of Component Management

Our component management services help you optimize the way you run your business, consolidate inventory and eliminate supply chain material and labor handling redundancies – increasing your profits and lowering your overhead.

1 Minimize inventory footprint

2 Maximize production space

3 Eliminate need for safety stock

4 Manage waste

“OUR REAL-TIME, LEAN DISTRIBUTION-BASED INVENTORY MANAGEMENT TECHNOLOGY ENSURES ACCURACY AND TIMELINESS.”

6

Reduce administration, inventory and expediting soft costs

7

Ensure stock arrives at point of use when you need it

5

Eliminate MRP

8

Consolidate purchasing & billing

9

Reduce waste

A woman is operating a forklift in a warehouse aisle. The forklift is carrying a pallet of boxes wrapped in clear plastic and secured with green straps. The aisle is narrow, with a corrugated metal wall on the left and a concrete floor. The lighting is bright, coming from overhead fixtures.

Our VMI programs deliver hard savings and impact the bottom line

CASE STUDY

Hard Goods Manufacturer

Fast-Rite implemented a sophisticated, multi-staged VMI program to manage multiple points of use, hundreds of SKUs and dozens of packing sizes and methods.

Our Site Managers are stationed in the customer facility, performing VMI tasks, MRP analysis and order functions.

They provide data collection scanning services, replenish tote locations and direct material handlers for powered functions. Deliveries are made daily or more often if needed. They also serve as a front-line interface with the line and cell personnel to streamline the supply chain and provide an instant response to any inventory supply challenges. This reduces customer staffing requirements.

“FAST-RITE
IMPLEMENTED A
SOPHISTICATED,
MULTI-PRONGED
VMI PROGRAM”

CASE STUDY

Security Equipment Provider

A leading security equipment provider uses vending machines to control expensive MRO supplies. Extensive documentation is provided of user transactions including item, quantity, date and time used, and applicable user number.

Fast-Rite monitors real-time transaction data and reships when a minimum trigger point.

Access is by authorized personnel only and can be limited or restricted by quantity, item or number of transactions within a specified time period or login.

Data capture can be via swipe card, RFID, Key code or other methods. Data lockers can be added for larger items. Customers can access current inventory status usage.

CASE STUDY

Major Lighting Manufacturer

This client uses our VMI program for their entire inventory. Fast-Rite employees capture and electronically transmit order data back to our plant where restock material is immediately packed, loaded into trucks and readied for the next shift delivery.

This lean system allows for greatly reduced on-site safety stock — only 4 hours of material. Inventory footprint has been virtually eliminated and raw material is able to be strategically placed either at, or near, the POU.

Electronically monitor and replenish with our FAST-VEND virtual inventory systems

Electronically monitor and automatically trigger inventory replenishment.

Advanced digital bin systems automatically detect when your parts hit pre-set replenishment triggers and request the next refill. No need to walk in to scan the rack!

These devices include bin scales and automatic data feed bins.

Our calibrated weight-activated bins will calculate bin quantities

“ELIMINATE THE
ED FOR PURCHASE
ORDERS AND SAVE
TIME, FREEING UP
RESOURCES FOR
OTHER WORK.”

either by an exact item count or a trigger point. The former allows an understanding of usage per day and can even track individual user usage.

Did third shift consume everything in bin C5? We'll know, and can react RITE away. Eliminate the need for purchase orders and save time, freeing

up resources for other work. That's OEM Optimization!

Genius supply program vending solutions for your MRO Supply

Our state of the art vending machines and lockers are the easiest way to gain complete control of your MRO supplies.

They put MRO supplies where your employees work, saving you walking wages. They've been proven to reliably reduce parts consumption by 20% or more! Authorize users with 24-7 access to the items they need and retain complete audit trails for analysis. Plus we see real time inventory levels, allowing for immediate replenishment when needed.

This is OEM Optimization

We have saved our customers millions in productivity gains beyond simple component cost reduction savings.

\$16,426

RITE-size shipping containers to eliminate storage space demands and reduce handling time and costs.

\$97,000

Establish VMI system to cut labor costs and standing inventory.

\$6,760

Develop systems queries to identify exception items, freeing-up supervisor time and cutting employee costs.

\$74,170

Outsource packaging operations to expand production space and reduce employee and maintenance costs.

Our Lean Team productivity experts work closely with you to examine your operations, supply chain and manufacturing processes to find ways to maximize your overall profitability and efficiency.

We specialize in analyzing outsourcing opportunities, achieving parts consolidation and standardization, and optimizing employee time usage to streamline your operations, eliminate waste, create savings and ultimately improve your bottom line.

“WORK WITH THE EFFICIENCY EXPERTS & ACHIEVE REAL SAVINGS”

\$315,394

Redesign packing-kitting facility layout.

\$199,560

Improve operational efficiencies to cut overall overtime.

\$100,000

Develop an enhanced part which improved assembly process and reduced SKUs.

\$5,760

Improve supervisor effectiveness and open up floor space for more productive usage.

\$6,559

Establish inventory procedures to create ownership and accountability for location and count discrepancies.

MRO Genius and Integrated supply services for OEMs

Our Fast-Rite MRO Genius supply programs make it possible for our customers to single-source both components and critical MRO supplies: tools, lubricants, drill bits, abrasives, cutting tools and PPE (Personal Protective Equipment). And we can provide your Jan-San needs.

We carry hundreds of lines of MRO items, including virtually every major brand name on the planet plus quality private label items.

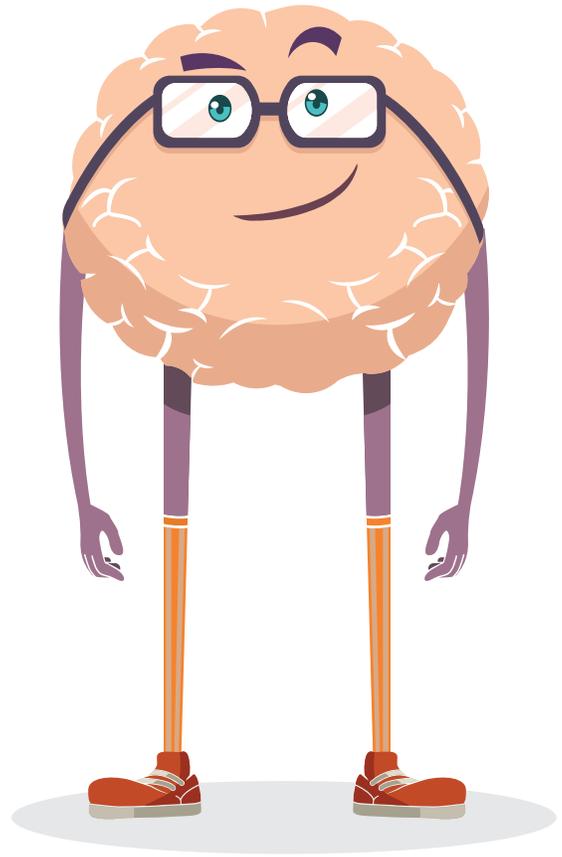

That means we can supply all your favorite brand names: over 200,000 line items of your preferred brand-names in chemicals, lubricants, abrasives and cutting tools, Jan-San and safety equipment. And you can keep your vendor count down and consolidate freight costs.

Our Genius Vending Program combine MRO Genius with our Fast-Vend machines for the cost reduction and usage accountability you crave and cost savings typically of 20% or more – and even larger productivity benefits.

Consolidating vendors, shipments and freight costs only makes sense. Our VMI Team members can add your MRO items to your Fast-Rite Genius Supply program, further simplifying your supply chain and freeing you up for more important things!

“WE CARRY HUNDREDS OF LINES OF MRO ITEMS, INCLUDING VIRTUALLY EVERY MAJOR BRAND NAME ON THE PLANET PLUS QUALITY PRIVATE LABEL ITEMS.”

Manufactured to industry-leading specifications

Every Fast-Rite component is manufactured to meet or exceed the most stringent international standards.
